Aero Consultants and Airtech Announce New UK Partnership To Provide Increased Support To The Local Composites Market

Airtech Advanced Materials Ltd. (the UK division of Airtech Advanced Materials Group) and Aero Consultants Ltd. are excited to announce their strategic partnership. Together, they have established a new site based in Huntingdon, Cambridgeshire, with the goal of offering enhanced support and services to the UK Composites market.

The brand-new facility features state-of-the-art equipment for storing and distributing the full range of products from Aero Consultants and Airtech, adding new capacity for Aero Consultants and complementing the existing Airtech Chadderton site. Once fully operational, customers and partners will benefit from the expanded range and timely deliveries in the region.

The partnership is focused on optimising customer interactions and streamlining processes between the two companies. By leveraging each other's strengths, Aero Consultants and Airtech aim to enhance the overall customer experience.

Darren Conniff, Aero Consultants Sales and Marketing Director comments "We are very excited to partner with the world's leading supplier of vacuum bagging and composite tooling materials, working from our new site in Huntingdon. We see this as a key step in our future growth and development of the Aero Consultants range in our 50th year in business."

Kerry Lee, Airtech VP General Manager, adds, "As a global supplier to the composite industry, Airtech has a well-established network of locations providing outstanding local service with global support. Our partnership with Aero Consultants further enhances our product distribution in the UK, bringing increased support and benefits to our customers."

Aero Consultants and Airtech are committed to working together to deliver the highest quality products and services. This strategic partnership reinforces the shared dedication of both companies to maintaining exemplary standards.

- Dexmet Lightning Protection

ABOUT AIRTECH ADVANCED MATERIALS LTD

Airtech Advanced Materials Ltd. is the UK division of Airtech Advanced Materials Group. Airtech Advanced Materials Group is the largest privately-owned manufacturer of vacuum bagging and composite tooling materials for prepreg/autoclave, resin infusion, and wet lay-up processes up to 799°F (426°C). Established in 1973, Airtech is a family-owned and operated business, committed to preserving its core values and leading industry innovations for over 50 years. Airtech serves a diverse range of sectors, including aerospace, wind energy, solar, marine, automotive, and general composites. The company's latest advancements in large-scale additive manufacturing, advanced Dahltram® tooling, and multi-purpose thermoplastic resins demonstrate Airtech's commitment to innovation and sustainable practices. The Airtech Advanced Materials Group encompasses Airtech International Inc. in the USA (Huntington Beach, CA; Chino, CA; Springfield, TN), Airtech Europe Sarl (Differdange, Luxembourg), Airtech Advanced Materials UK (Chadderton, England), Airtech Asia (Tianjin, China), and Airtech India (Goa, India). Airtech's global footprint provides access to resources and markets worldwide, while the company maintains a strong commitment to a community-focused approach in each region it operates.
